Viral/Covid Care Essentials

Your Biopolymer Make in India Factory-
DNA, RNA, PNA & LPA

Daily Lab Essentials

Glimpse of our OEM Production House & manufacturing hub producing various Viral/covid safety products, kits, Lab essentials & other various Life Sciences and Biotechnology services to promote 'MAKE IN INDIA'.

Glimpse of Our New Corporate Office at SEZ HUB A-305, ATS Bouquet, NOIDA

Meet our Director Mr. Sarvendra singh 'Anuj' & his SWAT Team who founded this dream company in 2013 with the goal to support Healthcare, Clinical & Diagnostic segments.

Director's Message

Dear Researchers,

Welcome to e-nnovation Life Sciences (eLS)!

Who We Are?

e-nnovation life sciences is a venture house with a team of young, skilled & experienced professionals in Indian life science/biotechnology industry. The word "e-nnovation" describe as Engineering & Innovation. We have experienced & analyzed from our professional experiences that our researchers require most of the preparation work ready in order to do actual research instead of spending significant time to do just preparation work and then doing actual research which turn into considerable delay to finalizing specific projects. Our goal is to meet these challenges and transforming them into opportunities.

e-nnovation life sciences identify innovative technologies, engineered products and reliable partners around the world that offers specific & considerable advantage over existing products, technologies & services available for our bio researchers as of now.

E-nnovation Life Sciences plays a major role in supplying essential products & services across India in this global health crisis that the world is currently facing due to COVID-19 pandemic. We work non-stop to serve our customer, essential services even in nationwide lockdown & partial lockdown to fight against this pandemic.

In this our exclusive portfolio we have more than 50% products under make in India scheme and rest are from twenty to hundred percent imported products & kits.

We request our customer/researchers to have eLS experience and offer their feedback to keep us improving & make this enterprise a better place to work with and a better company in serving life science.

Our Mission

"We at e-nnovation are always committed to deliver maximum reliability and minimum variability into any business association or your research procurement process"

You may write us and send your valuable feedback at – info@ennovationlifesciences.com & ennovationlifesciences@gmail.com.

Thanking You,
Sarvendra Singh " Anuj"
Director : Business Planning & Execution

Promoting MAKE IN INDIA Scheme

Devised to transform India into a global innovation and manufacturing hub, GoI launched 'Make In India' program in September 2014. DBT recognizes the necessity for entrepreneurship development among the youth in the country and hence has taken initiatives to build, support and promote Indian biotech ecosystem in healthcare, agriculture and industrial biotechnology.

We are proudly announces that E-nnovation Life Sciences a **MSME Registered Company** also contributes a small part in making "Make in India" initiative a successful one. Since 2013 (e-nnovation Life Sciences established) we are the key service provider of various Life Sciences & Biotechnology products & Services to numerous government as well as private institutions across India.

Also, we introduced our own manufactured premium quality PPE Kit at a very reasonable price across India. We are the key service provider of CSIR-IGIB, THSTI & many more to provide various products, kits & reagents for COVID-19 research.

Also, we serve our transportation facility to government institutes to collect various samples across India under our own BIOLOGISTIC division.

We are also awarded a **Certificate of Appreciation** by Ministry of Finance, government of India two times for the assessment Year **2019-20 & 2017-18**.

Our main aim is to make ourselves a most recommended Indian brand and promote 'MAKE IN INDIA' Program.

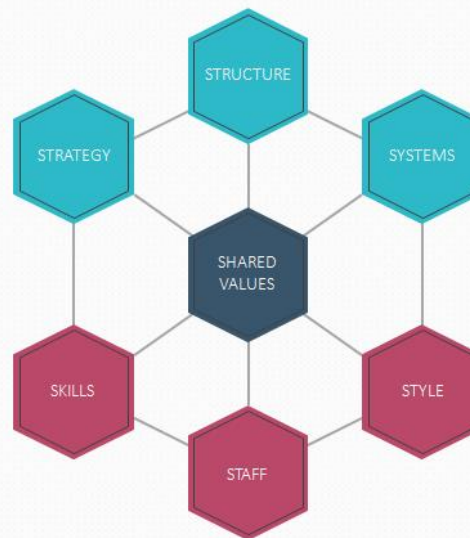

Company Profile

OVERVIEW

E-nnovation Life Sciences, established in early 2013, with the goal to support Healthcare, Clinical & Diagnostics segment by providing one stop solutions for all products, services and consultancy.

It was incepted by the professionals from Life Sciences and Biotechnology field.

Provides safe, effective, and affordable healthcare products and services.

2

OVERVIEW

Our existing establishments and achievements Pan India

Identifies Technologies and partners across the globe to offer specific & considerable advantage over existing products, technologies and services to the professional/research groups.

International partners with renowned companies like Source BioScience, LLC, GeneTools, CellPath, LGC Bio-search Technologies, etc.

We are committed to bridge the gaps between research and its commercial integration in the healthcare system.

Key Growth Verticals

ROADMAP

Celebrating our successful journey of 7 years with a aim to contribute towards 'MAKE IN INDIA' Concept

It is a matter of great pride to see your child grow up, embrace a good value system, seek high aspirations, and achieve more than what you ever thought was possible.

Yes, ennovation has made all of us proud not only just by his achievements but as much by his humility, grace, value system and courtesy.

Big news! Today, after successful journey of Seven years, we're launching e-nnovation foundation with a purpose to do some corporate social activities under CSR program. We already initiate our activities and working for people by helping them to fight against COVID-19 pandemic.

This year we launches our new Product called HUM SAFE SAFETY KIT with the purpose to serve basic health necessities to our community under MAKE IN INDIA Scheme.

We work as a provider of thoughtful technology that help researchers, clinicians and common man in today's growing world. We solve our client's toughest challenges by providing unmatched quality products, services and consultancy in Life Sciences, Biotechnology, Healthcare and Hospital segment. We have expertise across verticals such as product manufacturing, sales and customer service and will promise to serve like this forever.

Certifications

E-nnovation Biodiscovery Private Limited, a group venture of e-nnovation Life Sciences having following Certifications-

Certificate
E-NOVATION BIODISCOVERY PRIVATE LIMITED

This Certificate is issued to
E-NOVATION BIODISCOVERY PRIVATE LIMITED
Off no - 67 T/E, P no - 544 - A, Acharya Niketan, Mayapuri Phase - 1, East Delhi, Delhi-110091, India

after assessing the organization
Good Manufacturing Practice
and finding it in compliance with
GMP

For the following scope:
Manufacture, Formulate, Process, Develop, Refine All Kinds Of Pharmaceuticals, Antibiotics, Medical Preparations, Drugs, Chemical, Chemical Products, Dry Salts, Foods Biochemicals, Synthetic Reagents And Bioservices, All Kind Of Medical, Surgical And Scientific Research Protection Device Including Ppe, Safety Disposable Mask Biological Sample Transport Boxes Etc. Custom Bio Service Solution Including Biologics And Others

Certificate No. : 0420GMP3671
Certificate Date : April, 23, 2020
Issue Date : April, 23, 2020
Expiry Date : April, 22, 2023

Signed on Behalf of External Management

CERTIFICATE
This is to certify that the
Quality Management System
of
E-NOVATION BIODISCOVERY PRIVATE LIMITED
Off no - 67 T/E, P no - 544 - A, Acharya Niketan, Mayapuri Phase - 1, East Delhi, Delhi - 110091, India

has been independently assessed and found to be in compliance with the requirements of
ISO 9001:2015
This certificate is valid for the following Scope:
MANUFACTURE, FORMULATE, PROCESS, DEVELOP, REFINE ALL KINDS OF PHARMACEUTICALS, ANTIBIOTICS, MEDICAL PREPARATIONS, DRUGS, CHEMICAL, CHEMICAL PRODUCTS, DRY SALTS, FOODS BIOCHEMICALS, SYNTHETIC REAGENTS AND BIOSERVICES

1219QMS3566
December, 03, 2019
December, 02, 2022

CERTIFICATE NO.
DATE OF ISSUE
December, 02, 2020
VALID UNTIL
December, 02, 2021
2nd SURVEILLANCE ON OR BEFORE

Signed on Behalf of External Management

Certificate
E-NOVATION BIODISCOVERY PRIVATE LIMITED

Certificate of Compliance
Medical Device Directive : 93/42/EEC
Applicant Manufacturer
E-NOVATION BIODISCOVERY PRIVATE LIMITED
Off no - 67 T/E, P no - 544 - A, Acharya Niketan, Mayapuri Phase - 1, East Delhi, Delhi-110091, India

for the product
Manufacture, Formulate, Process, Develop, Refine All Kinds Of Pharmaceuticals, Antibiotics, Medical Preparations, Drugs, Chemical, Chemical Products, Dry Salts, Foods Biochemicals, Synthetic Reagents And Bioservices, All Kind Of Medical, Surgical And Scientific Research Protection Device Including Ppe, Safety Disposable Mask Biological Sample, Transport Boxes Etc. Custom Bio Service Solution Including Biologics And Others

The Submitted sample of the Products has been tested for CE marking according to the Medical Device Directive. External Management Services has limited liabilities in the audit for certification of the products and in case of alteration of the products, not agreed upon by us, this declaration will lose its validity.

Our Correspondent

Millions and millions of people are suffering from various diseases. The biological agents in a disease process through application of scientific and engineering principles result in various medicines of research, scientific and technological progress are being developed in the present. Research innovation in the field of biotechnology is the key to the cure of various diseases. The research in scientific progress is being made in various fields of biotechnology. The research in scientific progress is being made in various fields of biotechnology.

Our USP is professionally managed and effective marketing strategies for research and applications with financial returns and a continuous effort for a positive impact on the society. The research in scientific progress is being made in various fields of biotechnology.

Oligonucleotides Synthesis / your DNA polymer factory

"E-nnovation Life Sciences" have emerged as one of the leading processors as well as suppliers of a comprehensive range of chemicals; oligo synthesizers have a wide range of Bio-Fertilizers, Probiotics & Plant growth promoters. Owing to our knowledge and

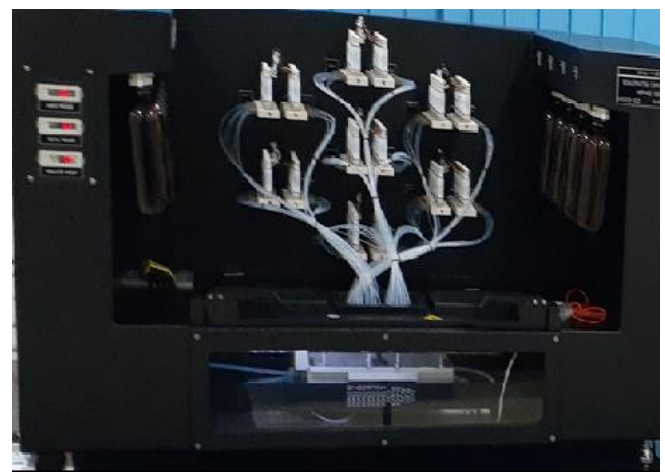

experience of this field, we have encountered superlative success in the past few years.

We have our OEM Partners across INDIA with Government approved units in Telangana, Hyderabad etc.. Our R&D center and Facility-I is in Aleap Industrial Estate, Pragati Nagar, Medchal, Malkajigiri Dist. Our main production unit is Facility-II is located at Navodaya Industrial Estate, Charlapally. Our research unit is well-

equipped and caters to ascertaining the exact trends of the market. We house a quality unit that undertakes the responsibility of various quality tests throughout the production process.

We are proudly announces that as per our MAKE IN INDIA Scheme we have our in-house expertise in assay design, oligonucleotides synthesis and SNP Validation that enable us to deliver accurate data, quickly and cost-effectively. We specialize in smaller to mid size projects providing intense customer service assay design to data delivery and discussing your experiment results.

Call: 011-42760231 | +91 9711-34-7133

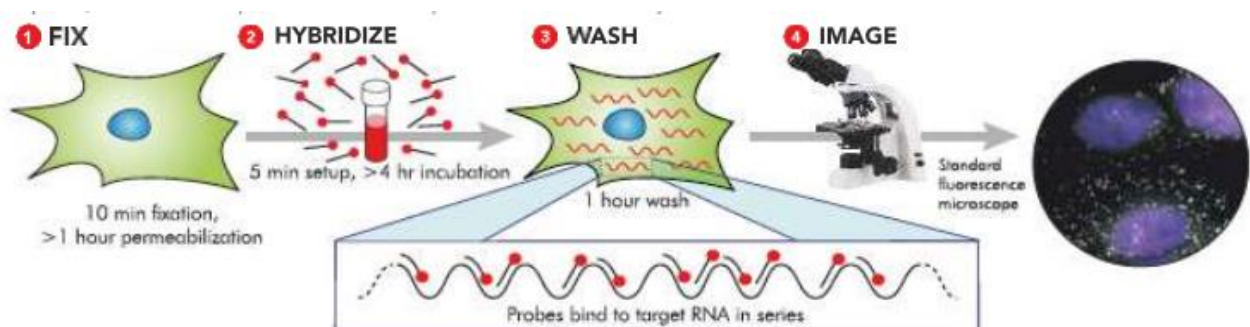

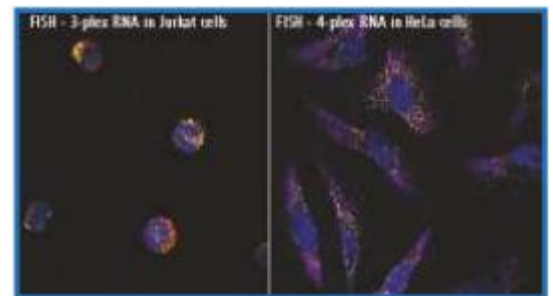

E-mail: enovationlifesciences@gmail.com | info@enovationlifesciences.com

More details visit us: www.enovationlifesciences.com

We have primers and probes for SARS-CoV2 qPCR assays as recommended by WHO. These oligonucleotides are available with all established dye/quencher combinations and also as large scale synthesis. We have customized Biopolymer Services for our customers-

- **DNA Oligos**
Unmodified oligos, Short and extra long oligos, XXL DNA (10-500 mg), sequence modifications, wobbies.
- **RNA Oligos**
Unmodified RNA upto 120 bases, RNA oligo annealing, XL and XXL RNA (5-50 mg), RNA modifications, 2' Modified RNA.
- **qPCR Probes, PNA Oligos, FISH Probes and many more.**

Also, we have FISH Probes technology that enables simultaneous detection, localization and quantification of individual mRNA molecules at the cellular level. This much improved and simplified FISH technology makes use of multiple single-labeled oligonucleotides probes to provide a high degree of specificity and sensitivity. We have a wide range of Custom FISH Probes.

The dye choices in a multiplex assay are largely determined by the filters available to a researchers.

Oligonucleotides Probes & Primers

Molecular Services Overview

Accelerating breakthroughs in genetics, drug discovery, biomarker research, and molecular diagnostics.

We offer a full suite of accurate and cost-effective preclinical molecular services both as a complement to our Global BioRepository and as a stand-alone business.

We have 20 years of experience with validated laboratory protocols to ensure accurate results with timely turnaround times.

We offer a full range of genomic and molecular biology services to customers across industry, research, and academic sectors of life sciences.

More details visit us: www.ennovationlifesciences.com

Here's a snapshot of our current services:

GENOTYPING

Our in-house expertise in assay design, oligonucleotide synthesis and SNP validation enable us to deliver accurate data, quickly and cost-effectively. We specialize in smaller to mid-size projects, providing intense customer service from assay design to data delivery and discussing your experiment results.

- > Assay Design Services
- > Data Analysis
- > Sequenom iPLEX / MassARRAY
- > Mass spec-based technology

DNA AND RNA EXTRACTION

We have 20 years of experience with genomic DNA and RNA isolation from nearly all biomaterials. Samples are quantitated by optical density. Quality of DNA is determined through electrophoresis. RNA quality control checks are performed through Agilent's Bioanalyzer.

- > Whole Blood, Blood Clots, Mouthwash, Buffy Coats, FFPE, Serum, Buccal Swabs, Tissues, Saliva, and more
- > Non-organic reagents
- > Column-based capabilities
- > Custom-developed protocols

- > Custom-developed protocols
- > Multiple Quality control practices
- > Gel check, OD 260/280, TaqMan, pico green quantitation

GENE EXPRESSION AND ALLELIC DISCRIMINATION (RT PCR)

Real-time PCR measures amplification cycle-by-cycle enables quantitative measurements during the exponential phase of PCR. We now utilize latest in the family of real-time PCR instruments by Applied BioSystems – the ViiA7™.

- > Real-time PCR
- > Life Technologies ViiA7
- > Mutation Analysis
- > Measure genomic DNA alterations
- > Insertions, deletions, copy number variations
- > TaqMan qPCR
- > Predesigned assays
- > Quantitative gene expression
- > Nucleic acid quantitation

MOLECULAR DIAGNOSTIC TESTING (CLIA CERTIFIED)

CLIA certified molecular diagnostic tests utilizing FDA approved GenMark Dx™ platform.

A COMPLETE RANGE OF DAILY LAB ESSENTIALS & COVID CARE ESSENTIALS

E-nnovation Life sciences a leading supplier of Medical goods with experience of more than 6 years in the industry along with its OEM Partners across India. We are pioneer in design and product development with best in class manufacturing process and efficient supply chain capabilities to ensure the highest level of customer satisfaction.

We have a wide range of COVID as well as other daily lab essentials and having a premium quality of transportation services across india which ensure the timely delivery of products & services by maintaining the quality as well.

We have our own manufacturing location across India which ensures the quality standard of raw material as all of our products are certified by various government agencies such as SITRA, DRDO, Ministry of Defence etc.

As the COVID-19 outbreak continues its charge, the crisis has brought about the rapid change in all the dynamics. People are in fear of going outside but some places are necessities such as banks, hospitals, vegetable markets etc. To achieve the objective of making people safe and comfortable and to help out the organization, we are trying to create awareness of hand sanitizing and germ protection.

More details visit us: www.enovationlifesciences.com

We are equipped with the latest infrastructure and resources to carry out manufacturing as per demand within the stipulated time. We have been catering to the needs of all type of clients starting from small business establishments to corporate giant.

**We are committed to
offer the best products.**

Having international certificates such as ISO 9001: 2015, GMP, CE, Registered Trademark

Our clients are medical professionals or the public in large and also the surge in demand in cosmos due to COVID-19 pandemic.

We have our OEM Collaboration with leading mask manufacturing company .

COVID/VIRAL Portfolio

S.No.	Catalog #	DESCRIPTION	PRICE Rupees
1.	EBPL-131	PPE-COVER ALL 75GSM, Blue color	750
2.	EBPL-HSM 101	PPE-COVER ALL 75GSM, White color	750
3.	EBPL-HSM-102	PPE-COVER ALL-Sealed with seam Tape 90 GSM, White color	900

e-nnovation Life sciences in association with our global sourcing partners offers Morpholino antisense oligos.

Morpholino oligos bind to complementary RNA and get in the way of processes; they can knock down gene expression, modify RNA splicing or inhibit miRNA activity and maturation. Morpholinos are the premier knockdown tools used in developmental biology labs, the best RNA-blocking reagents for cells in culture and, as Vivo-Morpholinos, the most specific delivery-enhanced oligos available for other animal models. We are the sole commercial manufacturer selling research quantities of Morpholinos world-wide.

Morpholino oligos are short chains of about 25 Morpholino subunits. Each subunit is comprised of a nucleic acid base, a morpholine ring and a non-ionic phosphorodiamidate intersubunit linkage. Morpholinos do not degrade their RNA targets, but instead act via an RNase H-independent steric blocking mechanism. With their requirement for greater complementarity with their target RNAs, Morpholinos are free of the widespread off-target expression modulation typical of knockdowns which rely on RISC or RNase-H activity. They are completely stable in cells and do not induce immune responses.

With their high mRNA binding affinity and exquisite specificity, Morpholinos yield reliable and predictable results. Depending on the oligo sequence selected, they either can block translation initiation in the cytosol (by targeting the 5' UTR through the first 25 bases of coding sequence), can modify pre-mRNA splicing in the nucleus (by targeting splice junctions or splice regulatory sites) or can inhibit miRNA maturation and activity (by targeting pri-miRNA or mature miRNA), as well as more exotic applications such as ribozyme inhibition, modifying poly-A tailing, blocking RNA translocation sequences or translational frameshifting. Morpholinos have been shown effective in animals, protists, plants and bacteria.

We are continually developing novel cytosolic delivery systems like our 'Endo-Porter' for cultured cells and our Vivo-Morpholinos for both cultures and in vivo delivery. With established delivery technologies it's easy to deliver Morpholinos into cultures, embryos or animals -- making Morpholinos the best tools for genetic studies and drug target validation programs.

What Sets Us Apart?

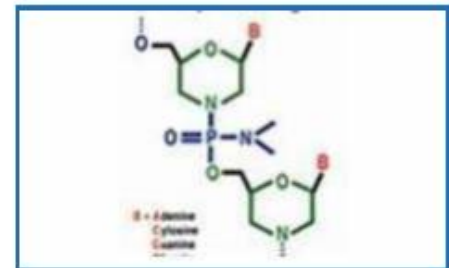

Morpholino oligos have excellent antisense properties compared to other gene knockdown systems. Microinjection or

electroporation of Morpholino oligos into the embryos of frogs, zebrafish, chicks, sea urchins and other organisms successfully and specifically shuts down the expression of targeted genes, making

Morpholinos an indispensable tool of developmental biologists. Morpholinos have also proven their versatility and efficacy in cultures of primary or immortal cells when delivered by Endo-Porter, electroporation or Vivo-Morpholinos. Usually, Vivo-Morpholinos are used to bring the specificity and efficacy of Morpholino oligos to experiments requiring systemic delivery in adult animals. The list of over 7500 publications using Morpholinos is growing daily and is maintained on-line in a browseable database. Besides providing the best knockdown and splice modification

tools, we also provide the best customer support available in the gene silencing industry. Our customer support team includes four scientifically active Ph.D.-level

scientists who are available to: 1) discuss your experiment design, 2) design your oligos for you, and 3) help you troubleshoot your experiments, all at no additional cost.

News

e-nnovation Life sciences now offers a blue-emitting fluorescent tag, 3'-Gene Tools Blue, as an available modification for Morpholino oligos.

Morpholino special issue of the Austin Journal of Drug Discovery, Development and Delivery.

e-nnovation BRAND Presents

Products Offered-

- Instruments
- Proteomic Products
- Genomic Products
- Cell Staining Reagents
- Flow Cytometry

E-nnovation Collaborate with Biotechrabbit to provide highest quality products & customized services.

Welcome to biotechrabbit!

biotechrabbit is a team of life science experts providing the highest quality products and customized solutions for your success!

Protein Research

- Tris-NTA His-tag Binding
- Protein Electrophoresis

End Point PCR

- Standard & Hot Start
- HiFi & Long PCR
- Reverse Transcription

Real Time PCR

- Dye-based qPCR
- Probe-based qPCR
- One Step RT qPCR

OEM/Services

We truly care about our partners. Find out how you can benefit from our customized solutions!

NA Isolation & Analysis

- Nucleic Acid Purification
- DNA Electrophoresis

Outstanding Performance

Try it for free. Request a sample!

Enzymes & Proteins

- Ultrapure Enzymes for Diagnostics and Molecular Biology

Antibody Services

- Antibody Development
- Monoclonal Antibody Production

Cell-free Systems

- Protein Synthesis Kits
- Site-directed Labeling

Applications

- Molecular Biology
- Protein Research
- Cell-free Synthesis

RealStar[®]

SARS-CoV-2 RT-PCR Kit 1.0

05/2020 EN

RealStar[®]

RealStar[®]

SARS-CoV-2 RT-PCR Kit 1.0

For use with

Mx 3005P™ QPCR System (Stratagene)

VERSANT[®] kPCR Molecular System AD (Siemens Healthcare Diagnostics)

ABI Prism[®] 7500 SDS (Applied Biosystems)

ABI Prism[®] 7500 Fast SDS (Applied Biosystems)

Rotor-Gene[®] 6000 (Corbett Research)

Rotor-Gene[®] Q5/6 plex Platform (QIAGEN)

CFX96™ Deep Well Real-Time PCR Detection System (Bio-Rad)

CFX96™ Real-Time PCR Detection System (Bio-Rad)

LightCycler[®] 480 Instrument II (Roche)

Total Tests are 384 & List Price of each Test is INR 1050/-

1. Intended Use

The RealStar® SARS-CoV-2 RT-PCR Kit 1.0 is an *in vitro* diagnostic test, based on real-time PCR technology, for the qualitative detection of lineage B-beta coronavirus (lineage B-βCoV) and severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) specific RNA.

It is intended to be used as an aid for diagnosis in individuals with signs and symptoms of coronavirus disease 2019 (COVID-2019) in conjunction with clinical and epidemiological risk factors.

The RealStar® SARS-CoV-2 RT-PCR Kit 1.0 is intended to be used by qualified personnel in appropriately equipped laboratories following the guidelines on laboratory biosafety.

2. Kit Components

Lid Color	Component	Number of Vials	Volume [μl/Vial]
Blue	Master A	8	240
Purple	Master B	8	720
Red	Positive Control*	2	250
Green	Internal Control	4	1000
White	Water (PCR grade)	2	500

* The Positive Control contains both targets, B-βCoV and SARS-CoV-2

CAUTION

Before first use check the product and its components for completeness with respect to number, type and filling. Do not use a defective or incomplete product, performance could be compromised.

3. Storage

- The RealStar® SARS-CoV-2 RT-PCR Kit 1.0 is shipped on dry ice. The components of the kit should arrive frozen. If one or more components are not frozen upon receipt, or if tubes have been compromised during shipment, contact Altona Diagnostics GmbH for assistance.
- All components should be stored between -25°C and -15°C upon arrival.
- Repeated thawing and freezing of Master reagents, Internal Control and Positive Control (more than twice) should be avoided, as this might affect the performance of the assay. The reagents should be frozen in aliquots, if they are to be used intermittently.
- Storage between +2°C and +8°C should not exceed a period of two hours.
- Protect Master A and Master B from light.

CAUTION

Improper storage conditions may lead to a compromised product performance.

CAUTION

Do not exceed thaw-freeze-sequence and handling durations as specified in these Instructions for Use.

CAUTION

Do not use product components beyond the expiration date printed on the component label.

6. Product Description

The RealStar® SARS-CoV-2 RT-PCR Kit 1.0 is an *in vitro* diagnostic test, based on real-time PCR technology, for the qualitative detection of lineage B-beta coronavirus (lineage B-βCoV) and severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) specific RNA.

The assay includes a heterologous amplification system (Internal Control) to identify possible RT-PCR inhibition and to confirm the integrity of the reagents of the kit.

Real-time RT-PCR technology utilizes reverse-transcriptase (RT) reaction to convert RNA into complementary DNA (cDNA), polymerase chain reaction (PCR) for the amplification of specific target sequences and target specific probes for the detection of the amplified DNA. The probes are labelled with fluorescent reporter and quencher dyes.

The probe specific for B-βCoV (target E gene) RNA is labelled with the fluorophore FAM™ whereas the probe specific for SARS-CoV-2 (target S gene) RNA is labelled with the fluorophore Cy5. The probe specific for Internal Control (IC) is labelled with the fluorophore JOE™.

Using probes linked to distinguishable dyes enables the parallel detection of B-βCoV specific RNA and SARS-CoV-2 specific RNA as well as the detection of the Internal Control in corresponding detector channels of the real-time PCR instrument.

The test consists of three processes in a single tube assay:

- Reverse transcription of target and Internal Control RNA to cDNA
- PCR amplification of target and Internal Control cDNA
- Simultaneous detection of PCR amplicons by fluorescent dye labelled probes

The RealStar® SARS-CoV-2 RT-PCR Kit 1.0 consists of:

- Master A
- Master B
- Positive Control (B-βCoV, SARS-CoV-2)
- Internal Control
- Water (PCR grade)

Master A and Master B contain all components (PCR buffer, reverse transcriptase, DNA polymerase, magnesium salt, primers and probes) to allow reverse transcription, PCR mediated amplification and detection of B-βCoV (target E gene) specific RNA, SARS-CoV-2 (target S gene) specific RNA and the Internal Control in one reaction setup.

6.1 Real-Time PCR Instruments

The RealStar® SARS-CoV-2 RT-PCR Kit 1.0 was developed and validated to be used with the following real-time PCR instruments:

- Mx 3005P™ QPCR System (Stratagene)
- VERSANT® kPCR Molecular System AD (Siemens Healthcare Diagnostics)
- ABI Prism® 7500 SDS (Applied Biosystems)
- ABI Prism® 7500 Fast SDS (Applied Biosystems)
- Rotor-Gene® 6000 (Corbett Research)
- Rotor-Gene® Q5/6 plex Platform (QIAGEN)
- CFX96™ Deep Well Real-Time PCR Detection System (Bio-Rad)
- CFX96™ Real-Time PCR Detection System (Bio-Rad)
- LightCycler® 480 Instrument II (Roche)

6.2 Sample Types

The RealStar® SARS-CoV-2 RT-PCR Kit 1.0 has been validated for use with the following sample type:

- Human respiratory swabs collected in universal transport medium (UTM)

The RealStar® SARS-CoV-2 RT-PCR Kit 1.0 has been validated using the AltoStar® Purification Kit 1.5 on the AltoStar® Automation System AM16 for nucleic acid extraction and purification.

7. Warnings and Precautions

- Before first use check the product and its components for completeness with respect to number, type and filling. Do not use a defective or incomplete product, performance could be compromised.
- Do not use other sample types! The use of other sample types may compromise the product performance.
- The presence of PCR inhibitors may cause false negative or invalid results.
- In case the sample contains other pathogens than SARS-CoV-2 competition with the target amplification or cross-reactivities may occur.
- Improper storage conditions may lead to a compromised product performance.
- A lack of centrifugation of the product components after thawing could lead to contamination of the components with reagent residues in the lids and as consequence to a compromised product performance.
- Do not exceed thaw-freeze-sequence and handling durations as specified in these Instructions for Use.
- Do not use product components beyond the expiration date printed on the component label.
- Improper handling of product components and samples may lead to contamination causing incorrect IVD examination results.

PRICE LIST 2020-21

Terms and Conditions of Delivery

Payments: Payments have to be made in the stipulated time if mentioned or 100% in advance. Bank Details for NEFT and RTGS are mentioned above for the company. For cheque, send on the address mentioned on the header of the quotation.

General: These terms apply in respect of sales of products, online services, newsletters, books, magazines and any combinations of such formats and updating services and “Goods & Services” as determined by e-nnovation Life Sciences a venture unit of e-nnovation Biodiscovery Pvt. Ltd. (“Supplier”) holds the right to change the price(s) or any other related information of any item without prior notice.

Price: The Supplier reserves the right to change the contents and/or price and/or delivery charges of any Goods at any time without prior notification. The price payable shall be the total price specified in the Supplier’s current price list, less any discounts agreed in advance by the Supplier and plus the applicable cost of packaging, postage and delivery (“Delivery Charges”). Any discounts agreed by the Supplier at the date of these terms and conditions shall have effect only for the duration covered by the Customer invoice or sales confirmation letter/e-mail unless specified in advance in writing. ☐ Prices are subject to GST at the applicable rate.

Cancellation: No refund is available in the event of cancellation at any point. However, if the products does not meet the quality specification, e-nnovation Life Sciences Pvt. Ltd. provides credit points to the customers of the products holding the same value.

Liability: The Supplier warrants that the products supplied will be free of defects and meets the full specifications. Although great care has been taken in the compilation and preparation of the Goods to ensure accuracy, the Supplier will make every endeavour to remedy any errors or attributable omissions.
